IN THE CLAIMS:

A complete listing of the claims is set forth below. Please amend the claims as follows:

1. **(Currently Amended)** An electronic commerce system for order acceleration through [[user]] document reuse, the system comprising:

a storage medium stored therein one or more document repositories ~~that stores~~ each including a plurality of [[user]] documents used during a first electronic commerce transaction;

a storage medium stored therein a global content directory including a plurality of classes organized in a hierarchy, each class categorizing the [[user]] documents and associated with one or more attributes of the [[user]] documents categorized in the class, at least one of the classes having one or more associated pointers that identify one or more of the one or more document repositories;

a storage medium stored therein a search interface associated with the global content directory, the search interface [[that]] communicates a search query to the one or more document repositories identified by one of the pointers to search the documents stored in the document repositories;

a storage medium stored therein a security module associated with the global content directory, the security module [[that]] decrypts the [[user]] documents to allow a user to access the [[user]] documents; and

a storage medium stored therein an intelligence module associated with the global content directory, the intelligence module [[that]] updates one or more sections in the [[user]] documents with current information associated with a second electronic commerce transaction.

2. **(Previously Presented)** The system of Claim 1 wherein the documents are stored in a shared document repository.

3. **(Original)** The system of Claim 1 wherein the documents comprise unique documents stored in one or more seller databases.

4.   **(Original)** The system of Claim 1 wherein the classes comprise a plurality of document classes.

5.   **(Original)** The system of Claim 1 wherein the classes comprise a plurality of product classes.

6.   **(Currently Amended)** The system of Claim 1 wherein the security module decrypts the [[user]] documents when the user requesting the [[user]] documents has a required permission level.

7.   **(Currently Amended)** The system of Claim 1 wherein the intelligence module updates the sections in the [[user]] documents when the user requests the [[user]] documents to be updated.

8.   **(Currently Amended)** The system of Claim 1 wherein the search interface allows the user to view [[user]] documents after the security module decrypts the [[user]] documents but before the intelligence <u>module</u> updates the [[user]] documents with the current information associated with an associated transaction.

9.   **(Currently Amended)** The system of Claim 1 wherein the intelligence module electronically creates one or more blank standard documents from the [[user]] documents, the blank standard documents requiring the user to manually enter data into the sections of the blank standard document the first time the user views the blank standard document.

10.   **(Currently Amended)** The system of Claim 9 wherein the intelligence module:

removes information from the sections of the [[user]] documents; and

arranges the sections in a particular order as a new document to create the blank standard documents.

11.   **(Currently Amended)** A <u>computer-implemented</u> method for order acceleration through [[user]] document storage and reuse, the method comprising:

storing, <u>by a server,</u> ~~storing~~ a plurality of [[user]] documents, used in a first electronic commerce transaction, in one or more document repositories;

associating, <u>by the server,</u> ~~associating~~ the [[user]] documents with a global content directory, the global content directory including a plurality of one or more classes organized in a hierarchy, each class categorizing the [[user]] documents and associated with one or more of the [[user]] documents categorized in the class;

searching, <u>by the server,</u> ~~searching~~ for particular [[user]] documents by navigating through one or more of the classes;

decrypting, <u>by the server,</u> ~~decrypting~~ the [[user]] documents to allow a user to view the [[user]] documents; and

reissuing, <u>by the server,</u> ~~reissuing~~ the [[user]] documents updated with current information associated with a second electronic transaction.

12.   **(Original)** The method of Claim 11 wherein the classes comprise a plurality of document classes.

13.   **(Original)** The method of Claim 11 wherein the classes comprise a plurality of product classes.

14.   **(Currently Amended)** The method of Claim 11 wherein reissuing the [[user]] documents comprises automatically changing one or more sections in the [[user]] documents to include the current information associated with the second electronic commerce transaction.

15.   **(Currently Amended)** The method of Claim 11 wherein reissuing the [[user]] documents comprises determining which sections of the [[user]] documents are generic and which sections are specific to a particular transaction.

16.   **(Currently Amended)** The method of Claim 15 wherein reissuing the [[user]] documents comprises dynamically adjusting the generic sections of the [[user]] documents.

17.   **(Currently Amended)** The method of Claim 15 wherein reissuing the [[user]] documents comprises determining which sections carry forward into one or more reissued [[user]] documents.

18.   **(Currently Amended)** The method of Claim 11 wherein decrypting the [[user]] documents comprises determining that the user has a permission level required for decryption.

19.   **(Currently Amended)** The method of Claim 11 further comprising viewing the generic sections and the transaction specific sections of the [[user]] documents after the decryption of the [[user]] documents.

20.   **(Currently Amended)** The method of Claim 11 wherein searching for particular [[user]] documents comprises navigating through the document classes searching for a particular type of [[user]] document.

21.   **(Currently Amended)** The method of Claim 11 wherein searching for particular [[user]] documents comprises navigating through the product classes searching for [[user]] documents associated with a particular product.

22.   **(Previously Presented)** The method of Claim 11 further comprising:

electronically creating one or more blank documents; and

manually entering current information into the one or more blank documents the first time the user views the one or more blank documents.

23.   **(Currently Amended)** Software for order acceleration through [[user]] document storage and reuse, the software embodied in a computer-readable medium and <u>when executed using one or more computers is configured</u> ~~operable~~ to:

store a plurality of [[user]] documents, used in a first electronic commerce transaction, in one or more document repositories;

associate the [[user]] documents with a global content directory, the global content directory including a plurality of one or more classes organized in a hierarchy, each class categorizing the [[user]] documents and associated with one or more of the [[user]] documents categorized in the class;

search for particular [[user]] documents by navigating through one or more of the classes;

decrypt the [[user]] documents to allow a user to view the [[user]] documents; and

reissue the [[user]] documents updated with current information associated with a second electronic transaction.

24.   **(Original)** The software of Claim 23 wherein the classes comprise a plurality of document classes.

25.   **(Original)** The software of Claim 23 wherein the classes comprise a plurality of product classes,

26.   **(Currently Amended)** The software of Claim 23 wherein reissuing the [[user]] documents comprises automatically changing one or more sections in the [[user]] documents to include the current information associated with the second electronic commerce transaction.

27.   **(Currently Amended)** The software of Claim 23 wherein reissuing the [[user]] documents comprises determining which sections of the [[user]] documents are generic and which sections are specific to a particular transaction.

28.   **(Currently Amended)** The software of Claim 27 wherein reissuing the [[user]] documents comprises dynamically adjusting the generic sections of the [[user]] documents.

29.   **(Currently Amended)** The software of Claim 27 wherein reissuing the [[user]] documents comprises determining which sections carry forward into one or more reissued [[user]] document.

30.   **(Currently Amended)** The software of Claim 23 wherein decrypting the [[user]] documents comprises determining that the user has a permission level required for decryption.

31.   **(Currently Amended)** The software of Claim 23 further <u>configured</u> ~~operable~~ to view the generic sections and the transaction specific sections of the [[user]] documents after the decryption of the [[user]] documents.

32.   **(Currently Amended)** The software of Claim 23 wherein searching for particular [[user]] documents comprises navigating through the document classes searching for a particular type of [[user]] document,

33.   **(Currently Amended)** The software of Claim 23 wherein searching for particular [[user]] documents comprises navigating through the product classes searching for [[user]] documents associated with a particular product.

34.   **(Currently Amended)** The software of Claim 23 further <u>configured</u> ~~operable~~ to:

electronically create one or more blank documents; and

manually enter current information into the one or more blank documents the first time the user views the one or more blank documents.

35.   **(Currently Amended)** A <u>computer-implemented</u> system for order acceleration through [[user]] document storage and reuse, the system comprising:

means for storing a plurality of [[user]] documents used in a first electronic commerce transaction;

means for associating the [[user]] documents with a global content directory, the global content directory including a plurality of one or more classes organized in a hierarchy, each class categorizing the [[user]] documents and associated with one or more of the [[user]] documents categorized in the class;

means for searching for particular [[user]] documents by navigating through one or more of the classes;

means for decrypting the [[user]] documents to allow a user to view the [[user]] documents; and

means for reissuing the [[user]] documents updated with current information associated with a second electronic commerce transaction.
